

You already have a broadband connection to surf the web and check your email...

That's all you need!

- **With BySky VoIP, the power of your phone becomes nearly limitless!**
- You can enhance your existing high-speed internet connection by taking advantage of a VoIP service that gives you features and benefits never realized with your traditional phone service. Voice mail, call waiting, call forwarding, follow-me, simultaneous ring, and so many more... all a part of the package at no extra charge!

What BySky Users Say:

“ The customer service has been very helpful. I had questions, but they answered them all and got me on the service in no time. I've already cut my phone bill in half or more, and am amazed by all of the additional features I have! The sound quality is crystal clear... I'm happy I made the decision to give BySky a try. Sure, I'd suggest them to anyone! ”

Todd S., user since August 2005

Use Your Existing Telephones, or Ours!

VoIP works on any type of phone. All that is needed is a small Analog Telephone Adapter (ATA) to convert your voice to the type of signals that can be sent over the internet. Once you are hooked-up, you will have the ability to make and receive calls to and from anywhere, just like you always have - but you will now have a long list of calling features that were never available to you - at no extra cost!

International Rates - Best in the Business!

Case Closed! BySky has the best international rates in the VoIP industry! We have closely scrutinized the other VoIP companies and exploited their weakness. Our international rates, and the voice quality for these calls, are far superior to our competitors - every call, every day, no matter when you call!

BySky Residential Service Plans

Our Most Popular:
